EDUCATION

CIIT College of Innovation and Integrated Technology | Quezon City

August 2024 – Present

B.S. in Computer Science / GPA: 3.64/4.0

- **Honors:** Dean's List

CIIT Senior High School | Quezon City

August 2022 – June 2024

TVL - ICT / Programming Track

- **Honors:** High Honors; Consistent Top 10
- **Subject Proficiencies:** Introduction to IoT, English for Academic and Professional Purposes, Application Development and Emerging Technologies, Oral Communication in Context

TECHNICAL SKILLS

Languages: Java, Kotlin, C++, C#, Bash, Python, JavaScript, TypeScript, Dart, SQL, HTML, CSS, Sass

Frameworks: React, Next.js, Node.js, Express, Flutter, Flask

Databases & Cloud: Firebase, MongoDB, MySQL, SQLite, Google Cloud, Vercel

Tools & Platforms: Git, Linux, Raspberry Pi, ngrok

Design & CMS: WordPress, FlutterFlow, Wix, Canva, Figma, Penpot, draw.io

RELEVANT EXPERIENCE

Software Developer — Freelance

May 2025

Remote

- Implemented CRUD functionality and report generation/export features for a **JavaFX-based** clinic management system, resolving platform compatibility and build issues.
- Collaborated with clients to understand workflow requirements and translate them into scalable software solutions.

Game Developer

July 2024 – Sept. 2024

Horror Hatch 3-DAY CHALLENGE | Yahaha Studios

- Developed **6 horror games** within multiple 3-day game jam events using the **Yahaha Studios** game engine, focusing on gameplay, immersive scenarios, and rapid prototyping.

WordPress Developer — Internship

Mar. 2024 – May 2024

CX Immersion | Hooman Design Corporation

- Redesigned the company's **mega menu using WordPress and Figma**, improving UX, navigation, and mobile responsiveness.
- Collaborated with a partner and supervisor to implement design specifications and optimize site accessibility.

Game Programmer

Aug. 2022 – May 2023

Visual Novel Development Club | CIIT Senior High School, Inc.

- Programmed **2 visual novel demos** in **Ren'Py**, including dialogue systems, branching narratives, and scene transitions.
- Collaborated with club members to integrate art assets, music, and sound effects, enhancing overall immersion and player engagement.

PROJECTS

Day Trading Simulator | *Data Structures & Algorithms Final Project*

- Partnered with a team of 2 and built a terminal-based trading simulator in **C++** with **Raylib**, planned UI flows in **Figma**, and implemented FIFO-queued delayed orders (5–10s) and procedural price generation (Perlin noise, sinusoidal functions)
- Developed a live ASCII graph to visualize real-time market trends and portfolio tracking (cash, holdings, P&L)
- Recognized as the Best Output in the section

CoDechipper – Unmask the Code | *CIIT Hackathon Jam 2026*

- Partnered with a team of 4 and developed a real-time multiplayer coding game using **Node.js**, **Express.js**, and **WebSockets**, tunneled sessions via **ngrok**, and planned the interface in **Figma**, supporting competitive and cooperative gameplay
- Designed dynamic coding challenges across multiple programming domains (C++, Python, SQL, Web, OOP) and synchronized game sessions across players in real time
- Built responsive front-end interfaces with **HTML**, **CSS**, and **JavaScript**
- Awarded as the Best Theme Interpretation and third place overall for the whole hackathon

UniFlow | *Mobile Application Development Final Project*

- Partnered with a team of 4 and engineered a centralized team communication app in **Android Studio** with **Room** and **SQLite**, integrating real-time messaging, file sharing, task checklists, and progress tracking while planning workflows and UI in **Figma**
- Implemented role-based access control and authentication to manage teams, channels, and project permissions

MedSync Clinic Management System | *Information Management Final Project*

- Partnered with a team of 3 and developed a relational database system for clinic operations (patients, scheduling, inventory) using **Flask**, **Python**, **SQLAlchemy**, **SQLite**, and designed dashboards in **Figma**
- Structured normalized schemas and implemented backend queries to streamline appointment scheduling, staff coordination, and inventory management
- Built front-end dashboards with **React** for real-time data visualization
- Recognized as Best Output in the section

UniMart | *Science, Technology, & Society Final Project*

- Partnered with a team of 6 and developed a cross-platform campus marketplace in **Flutter** and **Dart**, integrating Firebase for authentication, real-time database, and cloud storage while designing UI/UX flows in **Figma**
- Implemented product listings, order management, messaging, and vendor dashboards for smooth buyer–seller interactions

On The Move | *Technopreneurship Final Project*

- Partnered with a team of 5 and conceptualized a location-based discovery platform in **Flutter**, integrating **Firebase** and geolocation APIs for real-time tracking of mobile businesses, and designed app flows, maps, and prototypes in **Figma**
- Architected vendor profiles, live location updates, and subscription-based promotional features for enhanced customer engagement

AWARDS & ACHIEVEMENTS

- **3rd Place in Most Innovative Game | *Global Game Jam 2025***
- **3rd Best Overall Project & Best Theme Interpretation | *CIIT Hackathon Jam 2026***
- **3rd Place | *IT Wizard Competition — T.I.P. Manila***
